Carbon Fiber swept back handle EVA grip knobs on handle 11 lb.
Strike Saver Drag System 10+1 High Precision Ball Bearings Swept
back forge aluminum star drag Weight: 5.9 oz

Description

The Apex Flipping Reel is the only reel specifically engineered for flipping. Designed by #2 all-time B.A.S.S. Elite money winner and King of Flipping Denny Brauer, its ergonomic frame shape minimizes hand discomfort and maximizes efficiency. Its total reel weight of 5.9 ounces reduces arm and shoulder fatigue, and its thin arbor spool and nose design improve flipping accuracy and eliminate the need for a level wind mechanism. The aluminum frame and carbon fiber handle provide strength with reduced weight. 11 lbs. of drag combined with 10 plus 1 ball bearings and 7.3:1 gearing for right hand model and 6.5:1 gearing for left hand model deliver strong close range retrieves.
