Attaches to Piercing Clips to Convert to Non-Piercing Setup Single Hand Operation to allow Clipping with One Hand While Holding the Fish With the Other Hand. High Strength Nylon Material High Strength Stainless Steel Spring.

Description

The Ardent Smart Clip is an innovative product designed to reduce the stress on fish caused by piercing clip systems. Smart Clip will attach to any piercing clip making it non-piercing in seconds. Simply squeeze the clip, depressing the spring and the jaws will open. Release the spring pressure and the jaws will lock in place over the fish's lip. Non-piercing culling systems are becoming mandatory for many tournaments.
